

Imazapyr

Imazapyr is a branched chain amino acid synthesis (ALS or AHAS) inhibitor. It is non-phytotoxic to conifers and its ecotoxicology is very low. It is used to control annual and perennial grass and broadleaved weeds, brush, vines, and many deciduous trees in non-cropland use for rights-of-way, forestry site preparation and conifer release.

Action: * Non-selective

* Systemic

CAS No.: 81334-34-1

Technical Grade: 95% min.

Formulations: 21.4% SL

Packaging¹: * 25kg drum (TECH.)

* 1L bottle (SL)

| Crops | Target Weeds | Dose (a.i. g/ha) |
|--------------|---------------------------------------|------------------|
| Non-cropland | Annual and perennial gramineous weeds | 750~1500 |

¹NOTE: Upon request we provide customized packing
