

## **Haloxyfop-R-methyl**

Haloxyfop-R-Methyl is a selective systemic post-emergent herbicide which can be absorbed by the leave, stem and root of weeds, and translocated throughout the plant. It is widely used to control a wide range of annual and perennial grass weeds in broad-leaved crops, such as legume, cotton, peanut, rape, and vegetables, etc. Using same dose, its efficacy is much better than haloxyfop and other herbicide of same family.

**Action:** \* Selective

\* Post-emergence application

**CAS No.:** 72619-32-0

**Technical Grade:** 95% min.

**Formulations:** 108 g/L EC

**Packaging<sup>1</sup>:** \*25kg drum (TC)
